Claim 6 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim.. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for cloricromene or a salt, does not reasonably provide enablement for a base or derivative thereof. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The specification does not set forth what compounds are intended to be included in the scope of a base or derivative thereof.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 the word "containing" renders it unclear what else the claim requires. Amending the claim to recite "comprising" will overcome this rejection.

In claims 1-5 the word "compositions" render it unclear if more than one composition is being claimed. Amending the claims to recite "A pharmaceutical composition" will overcome this rejection.

In claims 2-3 the term "and/or" renders the claims unclear. In re Anderegg 51 USPQ 66.

Art Unit: 1614

In claims 2 and 4 it is not clear what "relative salts" are and the specification does not define this.

Claims 2-6 provide for the use of cloricromene, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 2-6 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

For purposes of compact prosecution the claims will be examined as though they were directed to composition claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by 4,349,566 or 4,362,741.

Each reference (column 1) discloses a pharmaceutical composition comprising cloricromene. The instant claims appear to differ over the references in reciting a

method of use. However, intended use does not impart patentability to a composition claim.
